## Pakistan Floods

Since early August, heavy monsoon rains have caused severe damage throughout the Khyber Pakhtunkhwa, Balochistan, Punjab, and Sindh provinces of Pakistan, affecting about 14 million people.

More than 1,400 people have died, and homes, crops, bridges, roads, government buildings, and business have been destroyed. The floodwaters have made Pakistanis increasingly vulnerable to waterborne diseases such as diarrhea and cholera.

UMCOR is responding to the Pakistan floods in collaboration with our partners on the ground there, including the Church of Pakistan, Church World Service, and GlobalMedic.

Through these partnerships UMCOR is providing clean drinking water, food, temporary shelter, and medical aid to tens of thousands of people affected by the crisis.
